

Amazon Lightsail

- Virtual Server, storage, database and Networking
- Low & Predictable pricing
- Simpler alternative to using EC2, RDS, ELB, EBS, Route53 ...
- Great for people with little cloud experience!
- Can setup notification monitoring of your Lightsail resources
- Use cases:
 - Simple Web Application (Has template for LAMP, Nginx, MEAN, Node.js....)
 - Websites (Template for WordPress, Magento, Plesk, Joomla)
 - Dev/Test Environment
- Has High Availability but no Auto-Scaling, Limited AWS integrations
